The Ancient Egyptians used different metals. They used iron, copper and bronze. Gold and silver were precious metals, so they were used for making jewelry. However, silver was very rare in Ancient Egypt. The Ancient Egyptians started using it more than 5,000 years ago. There weren't many silver mines in Ancient Egypt, so we think they brought it from other countries through trade. They used it to make jewelry and mirrors. They also used sheet silver to decorate statues. Because silver is not very durable, we don't find many silver Ancient Egyptian artifacts. Sadly, the salts in the tombs destroyed a lot of it, so we cannot see very much of it today.
